Stony Brook Robotics Team

# Sponsorship Packet

2019-2020

# INNOVATE, DESIGN, ***BUILD.***

Dear Potential Sponsor,

The Stony Brook Robotics Team (SBRT) is a competitive engineering design team operating at Stony Brook University.

Our team's mission is to foster an interest in robotics through competition, empower students to gain practical experience in engineering and design, and develop a core community of dedicated roboticists, scientists, and engineers at Stony Brook.

## **The projects:**

For the 2019-2020 academic year, SBRT is focused on developing the following robots: an autonomous car, and a Mars Rover. In addition to our technical projects, we organize the largest annual robotics competition at Stony Brook University.

As one of the largest engineering design teams on campus, SBRT's scale has allowed us to spread a passion for robotics and engineering across Stony Brook as well as the greater Long Island community. However, undertaking bold challenges — such as competing in the International Autonomous Robot Racing Competition or introducing hundreds of students each year to the field of robotics — would not be possible without the support from our sponsors.

## **Why sponsor SBRT?**

In return, we offer a reach of thousands across our marketing and media efforts, as well unique recruiting access to talented students at Stony Brook University. Ultimately, by sponsoring SBRT, your company is helping bright young minds from around the world pursue their passion for robotics and engineering.

Thank you for your consideration! We hope to work with you,

**Stony Brook Robotics Team**

# Sponsorship Tiers

	Bronze (\$500+)	Silver (\$2000+)	Gold (\$5000+)
